Seedsmen, Market Gardeners & Florists,

35 & 37 CORTLANDT ST.,

NEW YORK.

#### SOME REASONS WHY

#### MARKET GARDENERS

Will find it an advantage to buy of us.

WE have now been selling seeds for many years, and at the opening of every season we have tried to give sound reasons why, as a rule, growers for market were safer in buying seeds from us than from concerns that not only lack the practical experience we claim to have, but who also have not the facilities for testing their seeds before selling, that we possess. That our arguments have been convincing our steadily increasing trade furnishes the best reply. We know, that to our friends and customers, our constant repetition of the story must seem unnecessary, but they will understand that the advantages as seedsmen, which we claim to possess and state, are intended for those who have not dealt with us before.

Every now and again competitors will unfairly make the statement that our prices are high. The best answer we can make to such a charge is, to ask a comparison of the prices in this list with those of any house you deem equally reliable, and see if we do not average as low, or lower than they. Occasionally, some varieties, we will list at seemingly higher prices than some one else may offer, but when such is the case there are always good reasons, although somewhat difficult to explain in a list such as this. Take, for instance, such an article as Cabbage. We know that of certain leading sorts we have the very best strains in the country, brought about by a constant supervision in the selection of the heads for seed purposes nearest to the true type. This selection involves not only extra labor, but also a large loss of plants, because all failing to come up to the standard are thrown out. Consequently, we do not obtain as much seed as others who do not use the same care and supervision. With such a valuable crop as Cabbage, a matter of a dollar or two per pound in the price is a small consideration, when by the use of inferior or untrue seed, you may be subjected to a loss of hundreds of dollars. Another important instance that we might call attention to is that of Peas. This season we ask \$4.50 per bushel for our best stock of Extra Early Peas (Henderson's "First of All") Some one else, perhaps, lists Extra Early Peas at \$4.00 per bushel. Now, unless we can personally meet you and explain that the extra labor entailed in removing the runners from the growing Peas, or thoroughly "rogueing" the stock, as it is called—which increases the cost but insures purity—you naturally think that we are above the market, while the fact is that the party selling at \$4.00 per bushel probably makes a larger profit on his sales than we do at the higher rate. We could give dozens of other illustrations, but we think that we have stated sufficient to show any intelligent man that if good seeds are desired, a fair price must be paid.

**Postage on Seeds.**—As we do a large local trade, in justice to those of our customers who buy at our counters, we have for several years based prices in this list on the purchaser adding postage when buying Seed in bulk to be sent by mail. The postage we exact is this: that when seeds are ordered to be mailed in quantities of ½ lb. and upward, postage must be added to Catalogue prices at the rate of 16 cents per pound. As postage for Beans and Peas, please add 30 cents per quart; and to Corn, 20 cents per quart to Catalogue prices. But when ordered by the packet or ounce, either Vegetable or Flower Seeds will be sent by mail at Catalogue prices without extra charge.

#### ABOUT FORWARDING AND REMITTING.

Every order is executed at once on its receipt, or a reason given why it has not been sent, so that parties ordering may know that if goods are not received in proper time, it is almost certain that the letter has not been received by us. Remittances should be made either in the form of a Money Order, Bank Draft, Express Order, or Registered Letter. Remittances in any other way are entirely at the sender's risk. In regard to Postal Notes, which are likely to be largely used, we are obliged to say that, as they afford no security, and are readily negotiable into whomsoever's hands they may fall, we cannot hold ourselves responsible for letters lost in transit that may contain them.

PETER HENDERSON & CO. 35 & 37 Cortlandt Street,

# MARKET GARDENER'S LIST.

(From August 15th to October 15th, 1884.)

While we exercise the greatest care to have all Seeds pure and reliable, we do not give any warranty expressed or implied.—If the purchaser does not accept the Seeds on these conditions, they must be returned at once.—P. H. & Co.

PRICE.

#### How Our Book Premiums Can be Obtained.

The plan we adopted several years ago, of giving Mr. Peter Henderson's Books to customers, as Premiums on orders, has, we think, been mutually satisfactory; and as we shall continue the practice on a more extensive scale than ever, we ask of our patrons careful consideration to the terms detailed below, by which these different books may be obtained. Mr. Henderson's last production, "Garden and Farm Topics," as will be seen, can be had on orders of \$10 and upward, while for orders of \$20 and upward, the purchaser may select either "Gardening for Profit" "Practical Floriculture," or "Gardening for Pleasure."

While the selling price of these four works is \$1.50 each, we ourselves publish only one of them, "Garden and Farm Topics," which enables us to offer it as a premium on a smaller order. We make this statement to explain, what might otherwise appear contradictory. In the information given, these various books do not conflict with each other, as most of our costumers perhaps know. Here are the conditions: On all orders from this catalogue to the amount of \$10 and upward (in one order) we will include, without charge, a copy of Peter Henderson's new book, "Garden and Farm Topics," a work of 250 pages, handsomely bound in cloth, and containing an excellent portrait on steel of the author. The subjects this book embrace will be found below. When the order is to the extent of \$20 and upward, purchasers may choose any one of Mr. Henderson's three books, "Gardening for Profit," "Practical Floriculture," or "Gardening for Pleasure," the price of which is \$1.50 each; and when the order amounts to \$40 and upward, we will send the buyer his choice of any two of the above four books, or, instead, a copy of our late work, "Henderson's Handbook of Plants," the value of which is \$3.00, but it is understood that any book or books desired must be selected at the time of ordering. This last condition is imperative, and under no circumstances can we deviate from it; and customers must not be disappointed if we fail to honor subsequent demands made upon us for the books as Premiums.

Of the Books offered above as Premiums,

Garden and Farm Topics,—Contains portrait of Peter Henderson and embraces within its scope the following subjects:

Popular Bulbs and their culture. — Window Gardening, and Care of Plants in Rooms. — Propagation of Plants.—Rose Growing in Winter. — Green-house Structures, and Modes of Heating. — Formation and Renovation of Lawns.—Onion Growing. —How to Raise Cabbage and Cauliflower.—On the Growing and Preserving of Celery.—The New Celery "White Plume," — Strawberry Culture. —Root Crops for Farm Stock.—Culture of Alfalfa or Lucerne. —Manures and their Modes of Application. —Market Gardening around New-York —The Use of the Feet in Sowing and Planting.—Popular Errors and Scientific Dogmas in Horticulture.—Humbugs in Horticulture.—Draining.

- Gardening for Profit.—Price \$1.50.—Gives in comprehensive detail our twenty-five years' experience in *Market Gardening*. If you wish to grow vegetables for sale, you need this book. (In cloth, illustrated.)
- Practical Floriculture.—Price \$1.50.—Gives up to date our whole experience in the *Propagation* and *Growing of Plants* during the past thirty years. This work is a complete guide for those intending to become *Commercial Florists*. (In cloth, illustrated.)
- Gardening for Pleasure.—Price \$1,50.—Is a concise compendium, giving plain details for the culture of Fruits, Flowers, Vegetables, and General Gardening. For the use of Amateur Cultivators. (In cloth, illustrated.)
- Henderson's Handbook of Plants.—Price \$3.00.—Is a condensed encyclopedia of 412 pages, giving botanical classification, propagation and culture of nearly every known plant in cultivation, either ornamental or useful. Invaluable as a book of reference. (In cloth.)

#### CABBAGE, CAULIFLOWER,

AND OTHER SEEDS FOR

#### FALL SOWING.

In presenting this list of Seeds, we would call special attention to the time and manner of sowing. Full directions are given in our work, "Gardening for Profit," but we again place it here in a condensed form. Cabbage, Cauliflower and Lettuce Seeds that are sown to produce plants for cold frames, should be sown, in open garden, from 10th to 30th September, taking the latitude of New York as a guide, (where they are sown about 15th Sept.), earlier if for the North—later if for the South. In all cases be sure that the soil in which the seed is to be sown is thoroughly pulverized by digging or ploughing, harrowing or raking—sow in beds—4 feet wide is convenient—having the surface level and smooth. After sowing, rake regularly again over the surface, and roll, or pat the bed down with the back of a spade. Spinach should be sown about the same dates, the ground covered with at least two inches deep of rotted, stable manure, or in lieu of that some concentrated fertilizer at the rate of 1 to 2 tons per acre, then well ploughed or dug, and harrowed or raked. The seed sown in rows at one foot apart, if to be worked by hoe; at twenty inches, if to be worked by horse. The ground to be rolled in any case after sowing, if it can be done.

We have now ready for delivery, new crop (American grown) seed of the following leading varieties. If by mail, in quantities of \(\frac{1}{2}\) lb. and upwards, postage must be added to Catalogue prices at the rate of 16 cents per lb.

Henderson's Selected Early Jersey Wakefield Cabbage.

Henderson's Early Summer Cabbage.

#### HENDERSON'S SELECTED EARLY JERSEY WAKEFIELD CABBAGE.

To most growers for market the great value and characteristics of this variety are well understood. To those who may not, however, be familiar with it, we would say that it is justly considered the best Early Cabbage in cultivation. Among its merits, may be mentioned, its large size of head, small outside foliage, and its uniformity in producing a crop. The heads are pyramidal in shape, having a blunted or rounded peak. Last fall seed of Jersey Wakefield Cabbage sold readily for \$10 00 and \$12 00 per lb., owing to its scarcity. This season we are enabled to offer the same fine stock at following rates: 40c. per oz.; \$1 25 per ‡ lb.; \$4 00 per lb.

#### HENDERSON'S EARLY SUMMER CABBAGE.

It is now nine years since we first disseminated this variety, and with the many really good new things with which we have become identified, we consider this, perhaps, the best. The Early Summer is about ten days later than the Wakefield, but being of over double the size, it may be classed as the best large early cabbage. In weight it is equal to most of the late varieties, and its short outer leaves enable it to be planted nearly as close as the Jersey Wakefield, about 12,000 to the acre, while Early Flat Dutch, Winningstadt, etc., producing no larger heads, can only be grown at the rate of 8,000 to the acre. Another excellent quality of the Early Summer Cabbage is that it keeps longer without bursting open after heading than any variety we know of. We would however, caution those of our customers who intend to grow it in cold frames (to winter over) to sow it at least ten days later than the Wakefield, or other early varieties, as it has some tendency to run to seed if sown at the dates suitable for other early sorts. In this latitude we sow Early Summer on the 25th of September.

30c. per oz.; \$1 00 per \(\frac{1}{2}\) lb.; \$3 50 per lb.

#### HENDERSON'S EARLY SNOWBALL CAULIFLOWER.

During the past six years we have received hundreds of the most satisfactory testimonials from all parts of the country, from those who tried the Early Snowball. It gave excellent results from spring sowing, and it is equally certain to do as well when sown in fall and wintered over in cold frames. For this purpose the proper time for sowing in this section is from the 15th to the 25th of September. It is the earliest of all Cauliflowers, and is without an equal for forcing during winter and spring. Its dwarf habit of growth, and closeness of outside leaves especially recommend it for the purpose.

Price, 30 cts. per pkt.; \$1.50 per 1 oz.; \$5.00 per oz.

#### HENDERSON'S NORFOLK SAVOY LEAVED SPINACH.—AMERICAN GROWN.

CHOICE STOCK, VERY CURLY.

This is a comparatively new kind of Spinach, producing nearly twice the weight of crop as the ordinary sorts; by a comparative test in our trial grounds, the past four winters, we have proved it also to be the hardiest of all varieties of Spinach; a most important quality in cold districts. Many of our leading Market Gardeners in this vicinity, whom we induced to try it, are so thoroughly pleased with it, that they will now use no other variety.

Price, 30 cts. per lb.: 10 lbs. for \$2.50.

#### NEW THICK LEAVED SPINACH.

One of the best for market; thick leaved, somewhat crumpled, dark in color, and stands long without running to seed. This sort has recently become very popular in the neighborhood of New York.

Price, 30 cts. per lb.; 10 lbs. for \$2.50.

#### General List of Vegetable Seeds.

The prices quoted are based on customers paying delivery charges when sent either by express or freight, but as our prices on most heavy seeds, (notably Peas,) are very low, it will be found even after paying delivery charges, customers will have received their supplies at exceedingly favorable rates. Whenever desired, we will send by mail, but when this is to be done postage must always be added at the rate of 16 cts. per lb., or 30 cts. per quart for Beans and Peas, and 20 cts. per quart for Corn. Half a pound will be supplied at pound rates; half pecks at peck rates; half bushels at bushel rates. From this list no less a quantity than half an ounce in vegetable seeds will be supplied. When packets are wanted and they are not here priced, we will furnish, but at Retail catalogue prices.

#### Ready October 1st.

An entirely new Book on Farming, entitled:

### HOW THE FARM PAYS,

BY

#### WILLIAM CROZIER and PETER HENDERSON.

The following extract from the introduction, best tells the scope and plan of the work: "It is doubtful if any book on agriculture has ever been written in this country, of which the writers have had opportunities for such extensive and varied experience as have the authors of this work. William Crozier is, perhaps now better known than any other farmer on this continent, principally from the fact that for the past twenty years the exhibition of his fine stock and other farm products has enabled him to take more prizes than any other working farmer in the country, and that to-day the dairy and farm at Northport, L. I., on which these products have been raised, are models worthy of imitation by the tens of thousands engaged in farming who have failed to make it the profitable business that it has been, and still continues to be, to Mr. Crozier. The co-author, Peter Henderson, the senior member of our firm, although not a farmer, has long been considered as is well known, an authority on all matters relating to practical garden work. His book, Gardening for Profit, now in the hands of probably 100,000 readers, has shown how to make gardening pay. In the present work, Mr. Henderson tells in plain words the manner of growing such Vegetables and Fruits as can best be made profitable on the farm, besides interchanging with Mr. Crozier his opinion on such operations of the farm as his long practice in cultivating the soil enables him to do.

"Mr. Crozier and Mr. Henderson have had the project in contemplation, of getting up a work on American farming for the past ten years; but both being engaged in the active work of their large operations on the farm and garden, it is doubtful if they would ever have got together to accomplish it, unless the idea had been conceived of getting the work up in conversational form, the words as spoken being taken down by a stenographer. This simplified the work of book making greatly, and it is believed that given in this way, it has been made plainer and more interesting to the reader, than if written in the usual manner. The benefit of this plan is derived from the fact that the answer often suggests the question, just such as the reader would be likely to ask, but with no one at his elbow to answer. It is here answered to the satisfaction of the questioner, or if not, the question is repeated until the subject has been made clear."

We expect to have copies ready for sale by October 1st. How the Farm Pays is a large octavo volume of 400 pages, profusely illustrated and handsomely bound in cloth. Sent postpaid on receipt of \$2.50. Orders received now. We shall offer liberal inducements to clubs or buyers in quantity of this book.
